REASONS FOR ALLOWANCE

Claims 1-12 and 21-23 are allowed.

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious use of a low pass profile to suppress digital-to-analog converter, hereafter DAC, error in the claimed manner.

U.S. Patent 6,950,050 to Jordan converts high frequency energy content of DAC input pulses into a smoothed response having a substantially lower frequency [abstract]. U.S. Patent 6,373,418 to Abbey couples a low pass modulator [518: Fig. 5] to a DAC [520]. U.S. Patent 6,344,812 to Takeda et al uses a barrel shifter [5] in a DAC to reduce the number of sampling periods required for averaging [col. 6, lines 49-50].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick G. Wamsley whose telephone number is (571) 272-1814. The official facsimile number is (571) 273-8300. An alternate facsimile number, (571) 273-1814, should only be used for unofficial documents.
